

Symantec Enterprise Vault Upgrades ...from Creative Data

CURRENT BEST PRACTICES

It's not just updating the binaries. As we upgrade your system, we'll make sure that EV is configured properly to take full advantage of this exciting new release.

NEW VERSION FEATURES

Comprehensive support for Microsoft Exchange, Domino, and SharePoint. Enhanced Discovery Accelerator and deduplication. New API to integrate with storage platforms. And more!

PEACE OF MIND

Your email and documents are corporate assets. Rest easy knowing that you'll be upgrading to the best Enterprise Vault version ever!

You already know the importance of email and other documents; they're corporate assets. Valuable information is buried in emails, spreadsheets, and memos. And maybe your company is one of the many required by law to keep this information available and accessible. That's why you've invested in Enterprise Vault from Symantec.

You also know that enterprise software doesn't just "sit still". Vendors work to make it faster, better, and more reliable.

So how can you take advantage of the powerful archiving and eDiscovery features of the latest version of Enterprise Vault?

We're here to help! Creative Data offers a complete **Enterprise Vault Upgrade Program** to bring your Enterprise Vault installation up-to-date, and configured to take full advantage of each new EV feature.

We'll dive in and make sure the infrastructure is upgraded and configured to current best practices. We'll make sure your EV storage is using EV's optimized storage model – OSIS. And we'll help you understand and use EV's archiving and desktop policies.

In short, we'll do everything necessary so that your users benefit from every bit of functionality and performance built into Enterprise Vault!

- Bring your Enterprise Vault installation up to date and take advantage of the most powerful, flexible Enterprise Vault ever!
- Integrate EV with the latest versions of Exchange, Domino, and SharePoint, and more!
- As a bonus, your Discovery Accelerator users will benefit from all the latest improvements.
- New API allows Enterprise Vault to integrate with storage platforms to take advantage of advanced features found in enterprise storage devices, including (but not limited to) compliance storage, deduplication, energy efficiency and cloud storage.

EV Upgrade – Features and Benefits

We bring years of Enterprise Vault experience to every upgrade. When we're done, you can be sure that your installation will match current best practices. You'll know that storage is configured to take full advantage of the powerful EV single-instancing capabilities. You'll see how the supercharged Vault Cache will benefit every user. You'll understand archiving policies, and you'll be confident that the Common Task Launch Pad will help you do what's required to keep Enterprise Vault running smoothly.

Our experience means that we've "been there, done that". We've installed, configured, and upgraded every version of Enterprise Vault since EV v5.0!

The **Enterprise Vault Upgrade** is available for all versions of Enterprise Vault from v5.0 to the latest release.

What to Expect

We'll design an upgrade plan appropriate for your specific Enterprise Vault environment. These are some typical activities:

- Detailed project plan. You'll know exactly what steps are required to complete the upgrade process
- Best-practice configuration of key infrastructure elements, to take advantage of powerful, new EV features
- Configure the "Vault Store Groups". Ensure Optimized Single Instance Store (OSIS) is configured to meet your specific needs
- Evaluate use of archiving policies. Update provisioning groups to use Desktop Policies. Migrate to Vault Cache technology, replacing Offline Vault for a superior user experience
- If desired, upgrade your existing SQL Server to a newer version, or perhaps a more powerful server. Or both!
